## PROFESSIONAL

Fresh Graduated from Faculty of Engineering Tanta University with a Very Good as a Major Grade. My Graduation Project was on Design Steel structures which i got a great experience on steel experience and Hands on experience with many different tools and softwares while designing the whole project structure and writing the documents needed.

I'm a very responsible and self motivated person working hard to provide best practices and accelerated support for my projects i've worked on . My soft skills and passion helps a lot dealing with the on site problems and customer engagements. I'm always open seeking for feedback as i believe this is the best opportunity to move from better to best. Also I'm a great believer of Engineering continuous learning to cope with the market changes and new technology driven projects.

## PROFESSIONAL EXPERIENCE

### 1. Internship in Sicily Company in Dubai.

6/2017 - 7/2017

During my on month internship training on Sicily company in DUBAI i was mainly shadowing most of the Engineering work and learning about Shop drawing also attend and self study about the below:

- Green Buildings
- Safety Course

### 2. Design steel structures (Graduation Project )

3/2018 - 7/2018

Was a great and massive opportunity applying best practices and lesson learnt after four and half years of studying, main focus was about the Steel Structures as i designed two structure unites:

1. First one consists of a big hall and second floor for Offices.
2. Second one was a big storage area

#### **Actions:**

1. All Loads and Analysis done through SAP software.
2. Using AutoCad for all Design work.
3. Using Excel functions for all calculations needed.
4. Wrote a summary document on Word giving overview about the Project specifications .

### 3. Assad's Company for Constructions.

6/2018 - Current

#### **Challenges:**

As a part of Assad's Construction company my role there is a Site Engineering heavily involved and responsible for all construction related work including and not limited to :

- 1- supervisor for all workers, builders and technicians.
- 2- Quantity survey for all the concrete works taking the result the next stage while preparing the Purchase orders.
- 3- Responsible for building Walls around one of the Churches ( Foundations , Columns and Brick quantity survey ..etc).
- 4- Was involved in many Foundation work like digging, filling with plain concrete and reinforced concrete.
- 5- Working with different Isolation materials.

### Actions:

- Hands on experience with Excel functions.
- Heavily using Automcade and other software facilitating the design work.
- Work on Site daily supervising all the workers and technicians.

### Results:

1. Meet the Client expectations.
2. Meet the project timeline while achieving the targets on timely manner.
3. Always getting feedbacks if anything i can do better or any areas of improvements.

## **Trainings**

1. AutoCad (version 2010 & 2017) software
2. SAP ( version 20 )Software
3. Online Construction Course
4. Project Design Course ( El Mansoura University )
5. Green Buildings (In Dubai )
6. Safety Course ( In Dubai)

## **EDUCATION**

1. Faculty of Engineering Tanta University Major on CIVIL Engineering  
( Sept 2013 - June 2018)
2. Project Design Course , El Mansoura University ( June 2016 )

## **Languages**

- a. Arabic ( Mother Tongue )
- b. English ( fluent)
